1. FEI Stable Security

Requirements for Continental/Regional Games, FEI Eventing Championships, World Cup Final, World Cup Qualifiers, 4/3 star CCI events, please refer to the FEI Veterinary Regulations Art 1005 and Annex.

2. Reduced Stable Security

The following measures for CCI2*/1*; CIC3*/2*/1* events apply. **Measures can be reviewed on an annual basis according to necessity and experience.**

Minimum Requirements – see also Eventing Memorandum 2004

- a. The welfare of horses must not be compromised in any way.
- b. Stabling must be provided, if possible, on the showground site for all competing horses. In Western Europe, this will be temporary or permanent stables. Elsewhere, other arrangements may be the custom. However the requirements of ensuring safe stabling and equal and fair treatment for all competitors remain for all forms of stabling.
- c. At a CCI and CICs run over more than 2 days all competing horses must use the official event accommodation. For a CIC, stabling on site is not always required, since for competitions held on a single day, horses are sometimes not stabled at all. However, veterinary supervision and stewarding of horses applies to horses not stabled in the event facilities (Veterinary Regulations) as it does to those stabled at the event.
- d. Stables must satisfy the requirements of any local health/safety authorities. They must have appropriate fire-fighting equipment readily available, and emergency exits must be planned and kept clear at all times. Good stable management practice should be emphasised to the users – visible no smoking signs, advice to keep all gangways unobstructed, not to leave material in a position tempting to theft, etc.
- e. Stables (especially temporary ones) must be checked for physical safety and solidity.

- f. Whenever possible, horses from the same country should be stabled together. The provision of adequate isolation for horses, particularly those arriving from other countries should be ensured. In regard to Equine Influenza, if an event is held in conjunction with a National event (classes), the vaccinated horses must be separately stabled from the non-vaccinated ones
- g. Isolation boxes are required at some distance from the other stables, as well as boxes for medication control, wash down areas with hoses and space for the storage of tack and equipment.
- h. The layout and surroundings to the stables must be such that they can be properly managed with good order, that within reason the public can be kept out and that the stables may be "closed" at night.
- i. A Stable Manager and stewards must be appointed to assist the competitors on a 24 hour basis, to guard against horses getting colic, being cast in their boxes and e.g. the risk of fire, etc.
- j. The effective management of the stables will be greatly enhanced by a system of Control of Access – this includes defining a "secure area". This is obligatory in CCI*** and CCI**** events (see Vet Regs). For all other events, it is optional; but this does not relieve OC from their normal responsibilities as defined above.
- k. Security fences and access control will not be compulsory, however, the Vet. Delegate or the Technical Delegate have the right to require these measures or that a rope limit be set in order to ensure that vehicles are not parked too close etc. should it be needed for practical reasons.
